ACTION MEMORANDUM

SUBJECT: Immediate Removal Request for the Rome Coal Tar Site,
Rome, Georgia - Action Memorandum

FROM: Sue Fields,
On-Scene Coordinator

George Stein, for

TO: Jack E. Ravan
Regional Administrator, Region IV

PURPOSE

- A. This request is for authorization to proceed with an immediate removal of \$100,000 at the Rome Coal Tar Site in Rome, GA. A significant threat to public health and the environment exists at this time and may worsen if response is delayed at this site.

BACKGROUND

- A. Incident or Site Setting/Description:
1. Physical location - The site is located at 102 West Second Avenue in downtown Rome, Floyd County, Georgia.
 2. General character of site - The site involves a concrete pit which holds waste from a facility which used the carbonization process to produce coal gas for the city of Rome 1890 to 1930. The pit was unearthed during a renovation project, and approximately one half of the material was mixed with soil and dumped outside of Rome off John Davenport Road. Construction debris was thrown on top of the sludge remaining in the pit.
 3. Waste Management - Both the waste pit and the pile of excavated material off John Davenport Road have been covered with soil to temporarily mitigate the air pollution problems the unearthed waste has caused.

4. Surrounding Areas - The waste pit is in downtown Rome, approximately 250 feet from the Oostanaula River and less than 100 feet from a retail shop/apartment complex which is scheduled to open in early June.

The pile of excavated material is located along John Davenport Road, approximately 200 feet from Little Dry Creek and 100 feet from the roadway.

B. Quantity and Types of Substances Present:

The sludge material is approximately 50% polynuclear aromatic hydrocarbons (PNA's). The sludge is also contaminated with 1,700 ppm phenols. The volume in the pit is estimated at 160 cubic yards. The pile contains approximately 140 cubic yards of waste.

C. Is the site on the NPL? If so, when is later remedial action expected?

No.

THREAT

A. Threat of Exposure to Public or the Environment:

The waste pit downtown threatens a release to the Oostanaula River, and the pile outside Rome threatens the Little Dry Creek. Both locations present a threat to the public health due to inhalation and possible dermal exposure.

B. Evidence of Extent of Release:

The site was initially brought to our attention by Rome's fire chief who had received numerous complaints about odors emanating from the pit. Air pollution is still a problem at both locations.

C. Previous Actions to Abate Threat:

The pit and pile have been covered with soil as a temporary measure to reduce odors.

D. Current Actions to Abate Threat:

None.

ENFORCEMENT

See Attachment #1.

PROPOSED PROJECT AND COST

A. Objectives of the project:

To mitigate the threat to the public health and the environment posed by this site by removal and disposal of hazardous materials in the pit downtown and in the dump pile outside of Rome.

B. Cleanup Contractors	\$90,000
TAT costs	7,000
Intramural (HQ and Region)	3,000
TOTAL PROJECT CEILING	<u>\$100,000</u>

C. Project Schedule:

The project shall commence as soon as final disposal for the material can be arranged. On site operations should be complete in two weeks.

D. If applicable, describe how actions will be consistent with remedial plan.

N/A

REGIONAL RECOMMENDATION

Because conditions at the Rome Coal Tar Site meet the NCP section 300.65 criteria for an immediate removal, I recommend your approval of the immediate removal request. The estimated total project costs are \$100,000 of which \$90,000 are for extramural cleanup contractor costs. You may indicate your approval or disapproval by signing below.

Approve: John A. Little Date: 5/14/85

Disapprove: _____ Date: _____

Attachment # 1

Enforcement Sensitive:

An Administrative Order was issued to the current property owner, E. C. Systems, Inc. of Roswell, Ga on May 14, 1985. The respondent refused to comply with the order and notified EPA of their intent on May 14, 1985.
